

# Andrew Jensen, CFA

*Software Engineer | Portfolio Manager | Educator*

## Objective

---

I am seeking a software engineering role with a technology or financial services firm. I want to learn, be intellectually challenged, and be a strong contributor to an interesting team.

## Skills and Traits

---

- Familiar with BlackRock Aladdin, Visual Basic, SQL, Tableau, JS, HTML, and CSS.
- Very quick and focused learner.
- Communicative and empathetic team member.
- Curious, enjoy problem solving and intellectual challenges.

## Interests

---

I love the outdoors and enjoy backpacking, hiking, and skiing.

## Employment History

---

Sugar Bowl Academy | 2019-2022

Ruth Asawa San Francisco School of the Arts | 2015-2019

BlackRock Inc | 2010-2015

State Street Bank and Trust | 2007-2010

## Financial Services Experience

---

### **Asset Allocation Portfolio Manager | 2013-2015 | BlackRock Inc**

I co-managed a multi-asset book of >300 portfolios and >\$300B in assets. I represented portfolio management in client meetings to discuss operations, portfolio construction, and new business. I was the lead implementation portfolio manager for BlackRock's Multi-Strategy hedge fund, and I maintained its currency and beta hedges.

### **Consultant Relations Data Management | 2010-2013 | BlackRock Inc**

I supported the data requirements of the Global Consultant Relations group and the institutional sales force. I vastly improved processes to mitigate risk and reduce worker-hours (by more than 100 hours/quarter) by establishing scaled, automated methodologies that provided the team with accurate firm and portfolio information via Excel-based tools.

### **Fund Accounting Officer | 2007-2010 | State Street Bank and Trust**

I managed and developed a staff of 12 fund accountants and supervisors. I was hired in an entry-level position in 2007 and earned multiple, rapid promotions. I assumed lead roles in all fund accountant responsibilities including corporate actions processing, exception management, client reporting, and overseeing a major systems conversion.

# Teaching Experience

---

**Sugar Bowl Ski Team and Academy | 2019-2022**

**Ruth Asawa San Francisco School of the Arts | 2015-2019**

---

I've run courses in Algebra 1, Geometry, Algebra 2, Precalculus, AP Statistics, and AP Calculus in grades 8-12.

- My foci have been:
  - Providing multiple access points to new concepts
  - Assigning competency to low-status math learners to encourage engagement
  - Disrupting stereotypes, institutional racism, and other systems that have historically worked against underserved minorities and women
  - Creating a low-anxiety math classroom where students feel comfortable utilizing mathematical discourse to express their thinking and recognize that mistakes, confusion, and struggle are part of the learning process
  - Developing efficiencies to offer programming to students who are traveling or otherwise away from class for extended periods.
- At SOTA, I was the Math Department Chair, sat on the school-wide Academic Leadership Team, was a co-coach of the cross-country running team, and advisor to multiple clubs.

# Education

---

Rhythm School - Presently Enrolled

Chartered Financial Analyst (CFA®) Charterholder

Secondary Education Teaching Credential • San Francisco State University

Bachelor of Science in Mathematics • University of California - Davis
